### BACTERIOLOGICAL REVIEWS

#### AIMS AND SCOPE

Bacteriological Reviews is published under the auspices of the American Society for Microbiology to provide authoritative critical surveys on the current status of subjects and problems in the diverse fields of microbiology and cognate disciplines, such as immunology and genetics. This scope includes the occasional short monograph, incorporating and summating original investigations of such breadth and significance that they would lose cogency if published as a series of research papers. Bacteriological Reviews provides opportunity for the expert to interpret his special knowledge for the benefit of the main body of microbiologists. Both established workers and students just beginning research perforce depend increasingly on compendia for knowledge of progress outside the scope of their training and research interests.

A rational, balanced, interpretive development of the topic is preferred to a chronological treatment. Old history, if any, usually can be covered simply by reference to earlier reviews. A mere compilation or annotated bibliography does not adequately serve the objectives of this journal. Judicious selection of references is an important function of the reviewer and should constitute the first step in composition of a review. Personal views of authors may be presented as perspectives or test hypotheses. Suggestions of topics and potential reviewers are invited, even if the correspondent does not consider the preparation of a review himself.

#### INFORMATION FOR CONTRIBUTORS

Correspondence relating to editorial matters should be addressed to the Editor
Erwin Neter
State University of New York at Buffalo and Children's Hospital
219 Bryant Street
Buffalo 22, New York

Manuscripts and associated material should be sent in duplicate by first-class mail in flat form, not folded or rolled. *Bacteriological Reviews* cannot assume responsibility for manuscripts.

Prospective authors are invited to discuss with the Editor the suitability of their proposed essays. Submittal of a synopsis or topical outline for an advisory opinion is recommended, for it often elicits valuable constructive suggestions from editorial consultants. The acceptability of a review cannot, of course, be finally decided until the finished product has been examined. The length of a paper is no measure of its quality and it is only the latter that determines acceptability for publication. However, practical considerations make it desirable to set a provisional limit of 15 to 25 printed pages for a review (text, tables, figures, and references included; about 650 to 700 words of text or 28 references per page). References should be limited proportionately to not more than 100 to 150. A short monograph must come within the size of a single issue, about 70 pages. Reprints are sold to contributors at cost; an order blank and a table showing reprint costs are sent with proof.

The editorial style of Bacteriological Reviews conforms to the Style Manual for Biological Journals (American Institute of Biological Sciences, 2000 P Street, N.W., Washington 6, D.C.; \$3.00), except for the following qualifications. Author abstracts are not used. References should be listed alphabetically according to the last name of the senior author, numbered serially, and cited by number in the text. A table of contents showing the major headings, major subheadings, and minor subheadings of the text is usually desirable; consult recent issues of Bacteriological Reviews for styling. Instructions to authors published in the Journal of Bacteriology apply also to manuscripts submitted to Bacteriological Reviews.

Experience shows that the following matters need special emphasis because they are frequently ignored by authors. To expedite editorial review and preparation for the printers, submit two copies of manuscript, including illustrations. Submittal of original drawings, not larger than  $8\frac{1}{2} \times 11$  inches, is encouraged; glossy prints are suitable, not larger than  $8\frac{1}{2} \times 11$  inches and preferably not smaller than  $5 \times 7$  inches. Where appropriate, magnification should be indicated by a suitable scale on the photograph. Double space everything, including quotations, tables, legends for text figures, and references. This is essential to allow space for corrections and printer's instructions. Check each reference cited with the original publication; be sure to include titles and both first and last pages. Avoid references to unpublished data and personal communication; if unavoidable, use these citations in the text only, not in the list of references. It is preferable to summarize the supporting evidence wherever possible. It is the author's responsibility to obtain permission from the copyright owner to reproduce figures, tables, or quotations of more than 12 lines of text taken intact from previous publications, either his own or those of another author. Note that as a rule the journal or publisher (not the editor or author) is the copyright owner; however, as a matter of courtesy the author's permission should be obtained as well.

# BACTERIOLOGICAL REVIEWS

#### Information for Subscribers

Correspondence concerning business matters, such as subscriptions, lost copies, reprints, and changes of address, should be addressed to The Williams & Wilkins Company, 428 East Preston St., Baltimore 2, Maryland.

Bacteriological Reviews is issued quarterly in March, June, September, and December. The four numbers published in one calendar year constitute a volume. The subscription price is \$4.00 per year in the U. S. A.; \$4.25 per year in Canada; and \$4.75 elsewhere. Single copies when available, \$1.50 in the U. S. A.; \$1.75 elsewhere. Members of the American Society for Microbiology receive Bacteriological Reviews for part of their dues. All subscriptions should be renewed promptly, since the Publisher cannot guarantee to supply back numbers on belated renewals. New subscriptions and renewals are entered to begin with the first number of the volume that is current when the subscription order is received; if any number is out of print, a prorata refund will be made to the subscriber. Claims for copies lost in the mails must be received within 30 days (domestic). The Williams & Wilkins Company must be notified 60 days in advance of a change of address. Copies undeliverable because of incorrect address will be destroyed. Duplicates can be obtained, if available, from the Publisher at the regular price for single numbers.

THE WILLIAMS & WILKINS COMPANY
428 E. Preston St.
Baltimore 2, Maryland

# Antimicrobial Agents and Chemotherapy-1962

Proceedings of the Second Interscience Conference on Antimicrobial Agents and Chemotherapy Chicago, October 31-November 2 Sponsored by the American Society for Microbiology

Antimicrobial Agents and Chemotherapy-1962 will contain 108 contributions covering the important areas of current antimicrobial research.

Contributed papers accent the following important areas (with names of the responsible Conveners):

Infectious Diseases: Maxwell Finland, Lowell Rantz, Morton Hamberger, and Donald Nichols

Cancer Chemotherapy: Chester Stock

Chemistry of Antibiotics: Nestor Bohonos

Clinical Evaluation: George G. Jackson, Ralph Tompsett, Monroe Romansky, Gladys Hobby, Mark Lepper, and E. L. Quinn

Cephalosporins: John Sheehan and Joseph Lein Antibiotics—In Vitro Activity: G. B. Whitfield

New Antibiotics: Julius Berger

Synthetic Antimicrobials: Eugene D. Weinberg

Antibiotics—General: David Gottlieb

Edited by:

J. C. Sylvester (Director of Microbiologic Research, Abbott Laboratories)

approximately 875 pages \$12.00

available April 1963

To: AMERICAN SOCIETY FOR MICROBIOLOGY 115 Huron View Blvd. Ann Arbor, Michigan	
Please enter my order for copy(s) of Antimicrobial Agents and Chemo-therapy—1962 at \$12.00 per copy.	•
Please enter my order for copy(s) of Antimicrobial Agents and Chemotherapy—1961 at \$10.00 per copy.
